OpenCL Devices

- cl_int **clGetDevicesIDs** (cl_platform_id platform, cl_device_type device_type, cl_uint * num_entries, cl_device_id * devices, cl_uint * num_devices)
  - This obtains the list of available OpenCL devices associated with platform
  - If devices is NULL, this function returns the number of devices.
  - To specify the type of device IDs returned choose a value for device type, look at Table 3.2 for proper values.

OpenCL Devices

- cl_int **clGetDevicesInfo** (cl_device_id device,
  cl_device_info param_name,
  size_t * param_value_size,
  void * param_value,
  size t * param_value_size_ret)
  - This command returns the specific info about OpenCL platform.
  - Set param_value_size and param_value to 0 and NULL to get the size of a returned value.
